纵向深耕酒店餐饮产业链，横向拓展多元化平台体系

P&T 大湾 GBI P&T GBI is an enterprise integrating ceramic design, research and development, and production. Committed to satisfying hotel, catering, and gift customization through product and service innovation, satisfying groups that demand high-quality and high-value ceramic products, leading the revolution in daily-use ceramic tableware, and intelligently creating happy times on the dining table.

The 40,000-square-meter core production area of Chaozhou daily-use porcelain, the marketing network covers domestic first- and second-tier cities, and has expanded to the world, and is exported to Southeast Asia, Europe, North America, Australia, and the Middle East. Products and services have entered domestic and foreign five-star hotels, large catering chains, corporate gifts, etc., and over 100 large-scale Chinese and foreign engineering projects.

Q & A

Questions	Answers
1.What's the MOQ for LOGO/Pattern/Shape/Box ?	Usually 500/500/2000/500 for each item,takes about 15/15/25 working days Artwork requested.
2.Is gold rim products can use Oven?	All kind porcelain with gold rim or pattern with gold are not allow to use Microwave;
3.Why there are some gold rim uneven ?	Because all the gold rim are paint by hands,so each piece won't look exact same as machine production.
4.Why is there color difference in color glaze products? Especially the reative glazed collections.	Porcelain is a display of art. It is not all made by machines. Many processes need to be completed by craftsmen by hand, and will be affected by subtle effects such as temperature and humidity, so that each finished product will not be 100% exactly the same.
5.Why there are more or less quantity of customized products?	Customized products will be damaged during the firing process in the kiln,Although we have increased the quantity in advance, the final goodness rate is based on the quality inspection quantity.
